A Digital Rim Lock is a type of door lock that uses a digital keypad or keyfob to unlock the door. It does not use a traditional mechanical key and is often used in commercial and industrial settings. An Intelligent Cabinet Lock is a specific type of Digital Rim Lock that is designed to be used with cabinets or other storage units. It may include additional features such as card access, biometric authentication, and remote access. A card door lock is a specific type of lock that uses a card to grant access to the room or building. These types of locks are often used in hotels and other hospitality settings.

The door opens three times faster with one touch
