Fingerprint Door Lock, Key Sensor Door Lock, and Biometric Door Lock System are all types of smart door locks. The fingerprint door lock uses fingerprint recognition technology to unlock or lock the door by scanning the user's fingerprint. Key Sensor Door Lock uses key sensor technology to detect whether a key is inserted into the lock and unlock or lock the door accordingly. Biometric Door Lock System uses biometric identification technology such as fingerprint recognition, face recognition, or iris recognition to unlock or lock the door.
