Product Description

RFID technology allows the hotel lock to store multiple identification cards or keys in a compact electronic chip, eliminating the need for physical keys or cards. Guests can simply tap their room key or access card against the lock's sensor, and the lock will automatically unlock. Similarly, when a guest leaves the room, they can simply walk away, and the lock will automatically lock behind them. This not only ensures a fast and hassle-free check-in and check-out process but also eliminates the risk of lost or stolen keys or cards.
