Product Description

The electronic door lock typically includes a keypad or touchscreen interface that allows users to enter a unique code or access card to unlock the door. Additionally, it may include a card reader that can read data from a variety of different types of cards, such as credit cards or ID cards. This can provide additional convenience for hotel guests and other authorized users who may have multiple forms of identification. Some advanced electronic door locks may also offer additional features such as remote access, biometric authentication, and real-time monitoring.
