### **Product Description**

A Digital Rim Lock is a type of door lock that uses a digital keypad or keyfob to unlock the door. It does not use a traditional mechanical key and is often used in commercial and industrial settings. A Bluetooth digital lock is a specific type of Digital Rim Lock that uses Bluetooth technology to connect to a smartphone or other device. This allows users to control the lock remotely using a mobile app or other device, as well as receive notifications when the lock is accessed
