

## New Smart Door Lock 2023 B3 Fingerprint Smart Locks With Video Door Phone Compatible

Our Product Introduction

for more products please visit us on [smartdoor-lock.com](http://smartdoor-lock.com)

### Basic Information

- Place of Origin: Guangdong, China
- Brand Name: ELA
- Model Number: F15
- Minimum Order Quantity: 300 sets
- Price: Negotiable
- Packaging Details: Cheap Smart Home Fingerprint Waterproof Intelligent Password Digital Sliding Door Lock Inner Paper Packing:180mm\*325mm\*135mm One piece per box Outside Paper Carton:680mm\*380mm\*385mm 8 pieces per carton.G.W:23.5KG
- Delivery Time: 10-15working day
- Payment Terms: L/C, T/T, Western Union, MoneyGram
- Supply Ability: 9999 Acre/Acres per Day

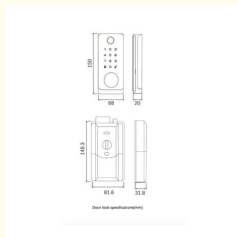

### Product Specification

- Door Type: Wood Door, Steel Door, Stainless Steel Door, Aluminum Door, Brass Door
- Unlock Way: 3D Face+APP+Fingerprint+Password+IC Card+Key
- Optional Features: 3D Face/Cat's Eye
- Optional Network: WiFi
- APP: Tuya Smart App
- Material: Aluminium Alloy
- Battery: 4200mAh Lithium Battery
- Mortise: 6068/240\*24mm
- MOQ: 1 PCS
- Power Supply: 4AAbattery
- Operation Temperature: -10 ~25
- Working Voltage: 4.3~6.5V
- User Capacity: X3 Administrators And 47 Users

## T3 Fingerprint Lock Manual

This fingerprint lock can add, delete and manage fingerprints and door cards directly through the keyboard on the lock or through the Tuya APP. The following two parts introduce the detailed operation steps on the fingerprint door card lock and the Tuya APP on the mobile phone.

### Part 1: Fingerprint Lock Operation Instructions

(Only door locks with card swipe function support card function)

In the factory state of this door lock, any fingerprint and door card can be unlocked. After registering fingerprints or door cards, illegal fingerprints and door cards will not be able to unlock.

If the fingerprint lock is bound to the mobile phone Tuya APP, it may be unlocked through the APP operation. Illegal fingerprints and door cards will not be able to unlock.

Before the fingerprint lock is shipped from the factory, the device will not turn on the Bluetooth distribution network mode until the fingerprint or door card is entered. At this time, the fingerprint password lock device cannot be searched by Tuya APP. Please press any key or fingerprint to wake up the system first. The Bluetooth network configuration mode will be turned on for 1 minute. At this time, you can search for the fingerprint lock manually or automatically through the Tuya APP. After 1 minute, if the device is not connected, it will automatically turn off distribution network mode.

The fingerprint door card lock can record up to 30 fingerprints and 50 door cards:

#### Add fingerprint:

1. Short press the RESET button (at the small hole on the rear panel), you will hear a "beep" sound, the blue light will be on for a long time,

and the voice prompt "please start recording", point the finger you want to set at the center of the fingerprint and touch it. If the fingerprint data is successfully collected, the green light will flash once, and a voice prompt "Please enter again". If the collection fails, the red light will flash once. A total of 6 valid fingerprints need to be collected. Entry is successful", indicating that adding fingerprints is complete. The pressing finger requires multi-angle acquisition, which is beneficial to the acquisition of the database and is helpful to the sensitivity of the recognition!

#### Add door card (with card swipe function):

1. Short press the RESET button (at the small hole on the rear panel), you will hear a "beep" sound, the blue light will be on for a long time, and the voice prompt "please start recording", put the door card close to the induction area, and hear a beep sound. If the acquisition is successful, the green light will flash once, and the voice prompt "Enrollment successful".

#### factory reset:

1. Press and hold the RESET button for 5 seconds (at the small hole on the rear panel), until the fingerprint red light is on, and the voice prompts "restore to factory settings successful", indicating that the factory reset is successful.

#### language switch:

Press and hold the normally open button for 5 seconds, until the green light of the fingerprint flashes, and the voice prompts the corresponding language "Chinese, (English)", that is, the switch is successful.

#### Normally open mode:

1. Short press the normally open button, hear a "beep" sound, and the voice prompts "normally open mode" or "close normally open mode", that is, the switch is successful.

**Low voltage:** When the voltage is lower than 4.8V, the red indicator light will flash 3 times continuously. And prompt "low battery", can continue to unlock, when the voltage is lower than 4.2V, the red indicator light will continue to flash 3 times, can not unlock.

#### Matters needing attention:

1. During use, if the battery is out of power (low power red light flashes slowly 5 times) and cannot be unlocked, you can use the USB port and external power supply (power bank, etc.) to emergency unlock.
2. In the factory state, any finger can be unlocked.

#### RGB tri-color LED status list

state	Red LED	Green LED	Blue LED	Note
Add fingerprint	Failed, short light 2 times, voice prompt "Entry failed, please re-enter"	Blink once and the entry is successful; after 6 consecutive additions are successful, the green light will be on and prompt "entry fingerprint enrollment successful"	Always on, waiting for administrator verification, blinking, fingerprint enrollment status	
add password	Fail, short light 2 times, prompt "password invalid"	Blinking, the input password is valid. When prompted "Please enter again", you need to enter it again; after a set of passwords are successfully entered, a voice prompt "Enter successfully"		

clear fingerprint password	Fail, short light 2 times	When the deletion is successful, the green light is on, and the voice prompts "Restore to factory settings successful"		
Fingerprint unlock	If the unlock fails, the short light will flash twice, and the voice prompts "Fingerprint error"	When the unlock is successful, the short light will be on, and the voice prompt "unlocked"		Press the fingerprint successfully, the motor rotates forward to unlock, and the motor reverses automatically to lock
password unlock	If the unlock fails, it will light up twice, and the voice prompts "password error"	When the unlocking is successful, it will light up briefly, and the voice prompt "Unlocked" will be displayed.		After the password comparison is successful, the motor rotates forward to unlock, and the motor rotates to automatically lock back.
Low Voltage Alert	Flash 5 times in a row			Any fingerprint operation

## Part II: Tuya APP Operation Instructions

(Only the ones with Tuya Bluetooth have the following functions)

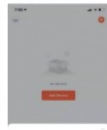

Download and install the "Tuya Smart" APP from the app market.

After installation, follow the prompts to register and log in.

### Distribute the network and connect the lock

Start the network distribution process: If no fingerprint or password is entered, press any button or fingerprint to enter the network distribution mode. If the fingerprint or password has been entered, the machine will automatically enter the network configuration mode;

Open the APP, you can add devices through the manual and automatic discovery windows. After the device enters the network configuration mode, the APP will automatically pop up the device discovery window. No display if multiple operations. Please press the fingerprint or password key once to wake up the fingerprint and password lock device, and let the device turn on the Bluetooth broadcast. For details, please refer to "Tuya Operation FAQ";

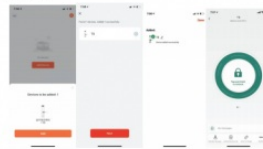

Discover to be added
