Product Description

ELA E-760 high-end smart fingerprint door lock can real-time cat eye monitoring facial recognition finger vein smart door lock

Product Description

1. Illegal opening alarm: When the door lock inputs incorrect unlocking information more than 5 times within 5 minutes, the system enters a locked state and will automatically unlock after 180 seconds of locking.

2. Anti pry alarm: When the door lock is pried or the anti pry button is triggered, the system will enter a continuous alarm for 30 seconds. Within 30 seconds, only valid unlocking information can be entered to unlock before the alarm can be cancelled

3. Virtual password anti peeping function: When the door lock is opened with a password, any virtual space can be added before and after the password to prevent the password from being peeped. The effective password length is 4-10 digits, and the total number of digits does not exceed 20.

4. Cat's Eye: Locked in sleep or wake-up mode, pressing the doorbell button has a doorbell effect and can also wake up the display screen inside the door. The indoor display screen can see visitors outside the door.
