

## Tuya APP System Selection Face Recognition Door Lock Emergency Power Supply Type C Rechargeable Lithium Battery Ensuring Door Access

Our Product Introduction

for more products please visit us on smartdoor-lock.com

### Basic Information

- Certification: CE/ISO9001
- Model Number: E-739
- Minimum Order Quantity: 500set
- Price: 99USD(EXW)
- Delivery Time: Delivery Time: 7 Days For Samples, 35-60 Days For Finished Products.
- Payment Terms: Payment:T/T , 30% Advance Payment, 70% Pay Before The Date Of Shipment.

### Product Specification

- Recognition Speed: ≤0.5 Seconds
- App: Tuya
- Voltage: 3.7v~ 4.2v
- System Selection: Tuya APP
- Operating Temperature: -10°C To 50°C
- Sell Point: Make Your Life Intelligent
- Recognition Technology: Infrared Face Recognition
- Finger Usage Angle: 360° Seamless Fingerprint Semi-conductor
- Highlight: **Tuya face recognition door lock, rechargeable lithium battery door lock, emergency power supply door lock**

**Product Description:**

The Face Recognition Door Lock is an advanced security solution designed to provide fast, reliable, and convenient access control for homes, offices, and other secure environments. Utilizing cutting-edge infrared face recognition technology, this biometric door lock ensures that only authorized individuals can gain entry, offering a high level of security that traditional locks simply cannot match. With its sleek design and intelligent features, the Face Recognition Door Lock is an ideal choice for anyone seeking a modern, efficient, and user-friendly locking system.

One of the standout features of this biometric door lock is its use of infrared face recognition technology. Unlike conventional facial recognition systems that rely solely on visible light, the infrared technology allows the device to accurately identify users even in low-light or no-light conditions. This ensures that the door lock operates smoothly and securely at any time of day, providing consistent performance without compromising security. The infrared sensor scans the user's face and matches it against the stored biometric data in less than or equal to 0.5 seconds, offering near-instantaneous recognition speed. This rapid response time enhances user experience by eliminating the need to fumble with keys or remember passwords.

Designed to be compatible with a variety of door setups, the Face Recognition Door Lock supports suitable mortises including models 6085 and 6068, among others. This flexibility allows for easy installation on a wide range of doors without requiring extensive modifications. Whether you are upgrading an existing lock or installing a new security system, this biometric door lock can be seamlessly integrated to fit your specific requirements. The compatibility with multiple mortise types also ensures that the lock maintains structural integrity and optimal functionality, providing peace of mind alongside convenience.

Another important consideration in any electronic locking system is its operating environment. The Face Recognition Door Lock is engineered to perform reliably across a broad temperature range, from -10°C to 50°C. This wide operating temperature range makes it suitable for use in diverse climates and conditions, whether in cold winter months or hot summer days. Users can trust that the biometric door lock will function without interruption or degradation in performance, regardless of external weather conditions. This robustness enhances the durability and longevity of the device, making it a dependable security solution for both indoor and outdoor applications.

Battery life is a critical aspect of any wireless or electronic security device, and this Face Recognition Door Lock excels in this area as well. It offers an impressive battery life spanning 6 to 12 months on a single charge or set of batteries, depending on usage patterns. This extended battery life reduces the frequency of maintenance and battery replacements, ensuring continuous protection with minimal user intervention. Additionally, the lock is designed with power-saving features and intelligent energy management to maximize efficiency. Users can also benefit from alerts and notifications that indicate when the battery is running low, preventing unexpected lockouts and enhancing overall usability.

In summary, the Face Recognition Door Lock combines innovative infrared face recognition technology with practical design and robust performance to deliver a superior biometric door lock experience. Its fast recognition speed of ≤0.5 seconds, broad compatibility with mortises such as 6085 and 6068, ability to operate in temperatures ranging from -10°C to 50°C, and long-lasting battery life of 6-12 months make it an exceptional choice for securing any property. Whether for residential or commercial use, this biometric door lock offers a seamless blend of security, convenience, and durability, making it an indispensable addition to modern access control systems. Embrace the future of security with the Face Recognition Door Lock — a reliable, efficient, and user-friendly biometric door lock that ensures your safety while enhancing your everyday life.

**Features:**

- Product Name: Face Recognition Door Lock
- Sell Point: Make Your Life Intelligent
- System Selection: Tuya APP
- App: Tuya
- Panel Material: CNC Aluminum Alloy
- Lock Dimension: 370mm \* 76mm \* 27mm
- Advanced Camera Door Lock technology for secure access
- High-precision Face Recognition Door Lock for fast and accurate identification
- Easy to manage and control via the Tuya APP
- Durable and stylish design with CNC Aluminum Alloy panel
- Enhance your home security with this smart Camera Door Lock system

**Technical Parameters:**

App	Tuya
False Acceptance Rate	<0.1%
Battery Life	6-12 Months
Suitable Mortise	6085/6068 And More
System Selection	Tuya APP
Recognition Speed	≤0.5 Seconds
Panel	CNC Aluminum Alloy
Lock Dimension	370mm * 76mm * 27mm
Operating Temperature	-10°C To 50°C
Emergency Power Supply	Type-C/Rechargeable Lithium Battery

## Applications:

The Face Recognition Door Lock model E-739 is an advanced Biometric Door Lock designed to enhance security and convenience in various application occasions and scenarios. Certified with CE and ISO9001, this Camera Door Lock ensures reliable performance and high-quality standards, making it an ideal choice for residential, commercial, and institutional use. Whether you want to secure your home, office, or any restricted area, the E-739 provides fast and accurate facial recognition technology that allows authorized individuals easy access without the need for keys or passwords.

This Biometric Door Lock is perfect for smart homes where intelligent living is a priority. Integrated with the Tuya app, users can remotely monitor and control access, receive real-time notifications, and manage multiple users seamlessly. The E-739 supports suitable mortises such as 6085 and 6068, making it compatible with a wide range of door types and installations. Its low voltage requirement of 3.7v to 4.2v combined with an impressive battery life of 6 to 12 months ensures long-lasting and uninterrupted operation without frequent recharging.

In commercial environments like offices, hotels, and coworking spaces, this Camera Door Lock offers enhanced security by preventing unauthorized entry while providing effortless access to employees and guests. For educational institutions and healthcare facilities, the E-739's biometric technology reduces the risk of lost or duplicated keys, ensuring safety and accountability. Additionally, its sleek and modern design adds aesthetic value to any door, blending security with style.

For bulk procurement, the minimum order quantity for the E-739 Biometric Door Lock is 500 sets, priced competitively at 99 USD (EXW) per unit. Sample delivery time is 7 days, while finished products require 35 to 60 days for delivery. Payment terms are flexible, with T/T accepted, requiring a 30% advance payment and the remaining 70% before shipment. This makes it convenient for businesses and distributors to adopt this cutting-edge security solution efficiently.

In summary, the Face Recognition Door Lock E-739 is suitable for a variety of scenarios—from enhancing home security to safeguarding commercial premises—offering a smart, reliable, and user-friendly access control system. Its combination of biometric facial recognition, app connectivity via Tuya, and durable battery life truly makes your life intelligent and secure.

## Customization:

Introducing the E-739 Face Recognition Door Lock, a cutting-edge Biometric Door Lock designed to make your life intelligent. Utilizing advanced Infrared Face Recognition technology, this Face Recognition Door Lock ensures secure and convenient access with a false acceptance rate of less than 0.1%.

Certified with CE and ISO9001, the E-739 guarantees high quality and reliability. It operates efficiently within a voltage range of 3.7v to 4.2v and supports seamless network connectivity via WiFi, enabling smart home integration and remote management.

We offer flexible product customization services tailored to your needs. The minimum order quantity is 500 sets, priced at 99 USD (EXW) per unit. Sample orders are delivered within 7 days, while finished products require 35 to 60 days for delivery.

Our payment terms include T/T with 30% advance payment and the remaining 70% payable before the shipment date, providing a secure and straightforward transaction process.

Choose the E-739 Biometric Door Lock for a reliable, intelligent security solution that enhances your home or office access control system.

## Support and Services:

Product Technical Support and Services for the Face Recognition Door Lock

Thank you for choosing our Face Recognition Door Lock. We are committed to providing you with comprehensive technical support and high-quality services to ensure your experience is smooth and satisfactory.

### Technical Support:

Our technical support team is dedicated to assisting you with installation, configuration, and troubleshooting of your Face Recognition Door Lock. We provide detailed user manuals and online resources to help you understand the features and functions of the device.

If you encounter any issues or require assistance, please refer to the troubleshooting section in the user manual or visit our official support website for FAQs and software updates.

### Warranty and Repair Services:

The Face Recognition Door Lock comes with a limited warranty covering manufacturing defects and hardware malfunctions under normal use. If your device requires repair, please follow the warranty guidelines outlined in the user manual.

We recommend that all repairs be performed by authorized service centers to maintain the warranty and ensure proper handling of the product.

### Software Updates:

To enhance security and functionality, periodic software and firmware updates are provided. Please ensure your device is connected to the network as specified in the user guide to receive these updates automatically or follow the manual update instructions.

### Installation Services:

Professional installation services are available to ensure your Face Recognition Door Lock is correctly mounted and configured for optimal performance. Please consult your local authorized dealers or service providers for installation assistance.

### Customer Feedback:

Your feedback is valuable to us. We encourage you to share your experience and suggestions to help us improve our products and services.

For detailed information on support policies, service terms, and product registration, please refer to the documentation provided with the product or visit our official website.
