

Tuya App Compatible Biometric Door Lock Suitable Mortise 6085 6068 and More Secure Access Control System for Commercial Buildings

Our Product Introduction

for more products please visit us on smartdoor-lock.com

Basic Information

- Certification: CE/ISO9001
- Model Number: E-739
- Minimum Order Quantity: 500set
- Price: 99USD(EXW)
- Delivery Time: Delivery Time: 7 Days For Samples, 35-60 Days For Finished Products.
- Payment Terms: Payment:T/T , 30% Advance Payment, 70% Pay Before The Date Of Shipment.

Product Specification

- Finger Usage Angle: 360° Seamless Fingerprint Semi-conductor
- Recognition Technology: Infrared Face Recognition
- Recognition Speed: ≤0.5 Seconds
- Operating Temperature: -10°C To 50°C
- System Selection: Tuya APP
- App: Tuya
- Panel: CNC Aluminum Alloy
- Network Connectivity: WiFi
- Highlight: **Tuya app biometric door lock, mortise face recognition lock, commercial building secure access control**

Product Description:

The Face Recognition Door Lock is an advanced security solution designed to provide convenience, safety, and modern technology all in one sleek device. Measuring 370mm in length, 76mm in width, and 27mm in thickness, this lock is compact yet robust, making it an ideal choice for residential and commercial doors alike. Its slim profile ensures that it fits seamlessly onto most doors without being obtrusive, combining functionality with aesthetic appeal.

One of the standout features of this Face Recognition Door Lock is its cutting-edge infrared face recognition technology. This technology allows the lock to accurately and quickly identify authorized users, granting access within seconds. Unlike traditional locks or even keypad systems, the infrared face recognition method enhances security by reducing the risk of unauthorized entry through stolen keys or codes. It provides a touchless, hygienic, and futuristic way to secure your premises.

Designed for versatility, this Camera Door Lock is compatible with various mortises, including the popular 6085 and 6068 models, among others. This compatibility ensures ease of installation without the need for extensive modifications to your existing door setup. Whether you are upgrading your current lock system or installing a new one, the Face Recognition Door Lock offers flexibility and convenience to fit your specific door type.

Another significant advantage of this innovative Camera Door Lock is its dependable power supply system. It is equipped with an emergency power supply feature that utilizes a Type-C port and a rechargeable lithium battery. This ensures that even in the event of a power outage or if the battery runs low, you can still power the lock temporarily to gain access without any hassle. The rechargeable lithium battery is designed to last between 6 to 12 months on a single charge, reducing the frequency of maintenance and battery replacements, which adds to the overall user convenience.

Security and convenience are further enhanced by the lock's ability to store multiple facial profiles, allowing family members or employees to have authorized access without the need for physical keys or cards. The infrared camera embedded in the lock captures detailed facial features even in low-light conditions, ensuring reliable recognition at any time of day or night.

This Face Recognition Door Lock not only serves as a security device but also acts as a smart home accessory that integrates seamlessly with modern lifestyle needs. Its camera door lock functionality provides an additional layer of surveillance by recording and monitoring access attempts, offering peace of mind to homeowners and business operators. With this lock, you can keep track of who enters and when, adding transparency and control to your security management.

Installation of the Face Recognition Door Lock is straightforward due to its compatibility with standard mortises and a compact dimension that fits most door types. The lock's durable construction ensures long-lasting performance even in high-traffic environments. Whether installed on a home front door, office entryway, or restricted access area, it provides an elegant yet secure solution.

In summary, the Face Recognition Door Lock combines innovative infrared facial recognition technology with practical design and reliable power options to deliver a superior security experience. Its camera door lock capabilities, flexible mortise compatibility, long battery life, and emergency power supply features make it a top choice for anyone looking to upgrade their security system with smart, efficient technology. Embrace the future of door security with this state-of-the-art Face Recognition Door Lock and enjoy a safer, more convenient way to protect your property.

Features:

- Product Name: Face Recognition Door Lock -----
- Recognition Speed: ≤0.5 Seconds for quick and efficient access
- False Acceptance Rate: Less than 0.1% ensuring high security
- Suitable Mortise: Compatible with 6085, 6068, and more models
- Sell Point: Make Your Life Intelligent with advanced face recognition technology
- Lock Dimension: Compact size of 370mm * 76mm * 27mm
- Equipped with a high-quality camera for reliable Camera Door Lock functionality
- Advanced Face Recognition Door Lock system for seamless and secure entry
- Innovative Camera Door Lock design combining security and convenience

Technical Parameters:

Voltage -----	3.7v ~ 4.2v -----
Network Connectivity	WiFi
Operating Temperature	-10°C To 50°C
Finger Usage Angle	360° Seamless Fingerprint Semi-conductor
Suitable Mortise	6085/6068 And More
Battery Life	6-12 Months
App	Tuya
Emergency Power Supply	Type-C/Rechargeable Lithium Battery
Sell Point	Make Your Life Intelligent
Lock Dimension	370mm * 76mm * 27mm

Applications:

The Face Recognition Door Lock model E-739 is an advanced Biometric Door Lock designed to provide high security and convenience for various applications. Certified with CE and ISO9001, this product ensures quality and reliability for both residential and commercial use. Its cutting-edge face recognition technology offers a False Acceptance Rate of less than 0.1%, making it highly secure against unauthorized access. The lock supports suitable mortises such as 6085 and 6068, making it adaptable to a wide range of door types. This Face Recognition Door Lock is ideal for smart homes, where quick and secure access is essential. Families can benefit from the ease of unlocking doors without keys, while also enhancing security against intruders. The integration with the Tuya app allows users to monitor and control door access remotely, adding an extra layer of convenience for homeowners who travel frequently or need to grant access to guests or service providers.

In office environments, the E-739 Biometric Door Lock enhances security by restricting entry to authorized personnel only. It eliminates the need for keycards or passwords, reducing the risk of lost credentials and unauthorized duplication. The emergency power supply through Type-C or rechargeable lithium battery ensures uninterrupted operation even during power outages, making it reliable for critical access points.

Hotels and hospitality businesses can also leverage this Face Recognition Door Lock to offer guests a seamless check-in experience. The quick face recognition feature speeds up room access while maintaining high security standards. Additionally, institutions such as schools, hospitals, and government buildings can deploy this Biometric Door Lock to safeguard sensitive areas, ensuring that only authorized individuals gain entry.

With a competitive price of 99 USD (EXW) per set and a minimum order quantity of 500 sets, this product is suitable for bulk purchases by distributors and large-scale projects. The delivery time ranges from 7 days for samples to 35-60 days for finished products, supporting timely project implementation. Payment terms are flexible, with T/T payments requiring a 30% advance and 70% before shipment.

Overall, the E-739 Face Recognition Door Lock combines state-of-the-art biometric technology, user-friendly app integration, and reliable power solutions to meet diverse application occasions and scenarios, making it a versatile choice for modern security needs.

Customization:

Our Face Recognition Door Lock model E-739 offers advanced biometric security with seamless customization services to meet your specific needs. Certified with CE and ISO9001, this Biometric Door Lock ensures high quality and reliability for your security solutions. We support a minimum order quantity of 500 sets, priced competitively at 99USD (EXW) per unit. Sample delivery is available within 7 days, while finished products will be delivered in 35-60 days, depending on order volume.

The Face Recognition Door Lock features a 360° seamless fingerprint semiconductor sensor, providing precise and quick fingerprint recognition. Integrated with Tuya app support and WiFi network connectivity, it offers smart control and monitoring capabilities for modern security systems.

With a false acceptance rate of less than 0.1%, this Biometric Door Lock guarantees superior accuracy and safety. The battery life ranges between 6 to 12 months, ensuring long-lasting performance with minimal maintenance.

Our payment terms include T/T with a 30% advance payment and 70% payment before shipment, facilitating smooth and secure transactions. Customize your Face Recognition Door Lock solutions with us for cutting-edge security tailored to your requirements.

Support and Services:

Thank you for choosing our Face Recognition Door Lock. To ensure optimal performance and security, please follow the guidelines below for technical support and services.

Installation Support: Our product comes with a detailed installation manual. Please read the instructions carefully before installation. For best results, install the door lock at eye level and ensure the camera lens is clean and unobstructed.

Software Updates: Regular firmware updates are released to enhance functionality and security. Please check the official website periodically to download and install the latest updates.

Troubleshooting: If you experience issues such as unrecognized faces, slow response, or lock malfunctions, try the following steps:
Ensure the camera lens is clean and not blocked.

Re-register your facial data in a well-lit environment.

Restart the device by powering it off and on.

Check for firmware updates and apply them.

If problems persist, refer to the user manual for detailed troubleshooting or seek professional assistance.

Maintenance: Keep the door lock clean and free from dust and moisture. Avoid using harsh chemicals on the device surface. Periodically verify the lock's mechanical components to ensure smooth operation.

Warranty and Service: The Face Recognition Door Lock comes with a limited warranty covering manufacturing defects for a specified period. Please retain your purchase receipt and warranty card for service claims. Unauthorized repairs or modifications may void the warranty.
