

Recognition Speed 0.5 Seconds Face Recognition Door Lock Utilizing Tuya App and System Selection Tuya APP for Fast Access

Our Product Introduction

for more products please visit us on smartdoor-lock.com

Basic Information

- Certification: CE/ISO9001
- Model Number: E-739
- Minimum Order Quantity: 500set
- Price: 99USD(EXW)
- Delivery Time: Delivery Time: 7 Days For Samples, 35-60 Days For Finished Products.
- Payment Terms: Payment:T/T , 30% Advance Payment, 70% Pay Before The Date Of Shipment.

Product Specification

- False Acceptance Rate: <0.1%
- Emergency Power Supply: Type-C/Rechargeable Lithium Battery
- App: Tuya
- Suitable Mortise: 6085/6068 And More
- System Selection: Tuya APP
- Recognition Speed: ≤0.5 Seconds
- Sell Point: Make Your Life Intelligent
- Finger Usage Angle: 360° Seamless Fingerprint Semi-conductor
- Highlight: **0.5 second face recognition door lock, Tuya app compatible door lock, fast access face recognition lock**

Product Description:

The Face Recognition Door Lock is a cutting-edge security solution designed to provide advanced protection and convenience for your home or office. This Camera Door Lock combines the latest biometric technology with seamless design, ensuring that only authorized individuals can gain access. Featuring a state-of-the-art infrared face recognition system, this Biometric Door Lock offers unparalleled accuracy and speed, making it one of the most reliable security devices on the market today.

One of the standout features of this Camera Door Lock is its 360° seamless fingerprint semiconductor technology. Unlike traditional fingerprint scanners that require precise finger placement, this innovative feature allows users to unlock the door from any angle. This means that your finger can be placed in any position on the sensor, and the lock will still recognize it instantly. This not only enhances user convenience but also increases the overall security by reducing the chances of failed recognition attempts.

The infrared face recognition technology embedded in this Biometric Door Lock ensures quick and accurate identification even in low-light or nighttime conditions. Infrared sensors capture detailed facial features, allowing the lock to distinguish between authorized users and intruders with high precision. This advanced recognition method drastically reduces false positives and enhances security, making it ideal for both residential and commercial applications.

Battery life is a crucial factor when it comes to smart locks, and this Face Recognition Door Lock excels in this regard. With a battery life ranging from 6 to 12 months, depending on usage, the lock ensures long-lasting performance without frequent battery replacements. This extended battery life is achieved through energy-efficient components and intelligent power management, providing peace of mind that your security system will remain operational for extended periods.

To further enhance user experience, the lock integrates seamlessly with the Tuya App, allowing for remote control and monitoring via your smartphone. Through the app, users can manage access permissions, view entry logs, and receive real-time notifications about door activity. This connectivity transforms the Camera Door Lock into a smart security hub, enabling homeowners and business owners to stay connected with their property no matter where they are.

In terms of design, the Biometric Door Lock boasts compact dimensions of 370mm in height, 76mm in width, and 27mm in depth. This sleek and modern profile ensures that the lock fits comfortably on most standard doors without being obtrusive. The durable construction not only adds an aesthetic appeal but also guarantees long-lasting durability against daily wear and tear.

Overall, the Face Recognition Door Lock represents the pinnacle of biometric security technology. Its combination of 360° seamless fingerprint semiconductor recognition, infrared face recognition, long battery life, and smart app integration sets a new standard for Camera Door Locks. Whether you are looking to upgrade your home security or enhance access control in a commercial setting, this Biometric Door Lock offers a sophisticated and reliable solution that meets the demands of modern security needs.

Investing in this advanced Camera Door Lock means embracing the future of secure access control. Its intuitive operation, combined with robust security features and convenient app management, makes it a must-have for anyone serious about protecting their property. Experience the convenience and peace of mind that comes with a truly intelligent Biometric Door Lock, designed to keep your premises safe while offering effortless access for authorized users.

Features:

- Face Recognition Door Lock with advanced Infrared Face Recognition technology
- Compatible with Tuya App for easy remote control and management
- Long-lasting battery life of 6-12 months for reliable performance
- Suitable for mortises including 6085, 6068, and more
- Operates on a voltage range of 3.7v to 4.2v
- High-quality Camera Door Lock ensuring secure and convenient access
- Dual functionality as a Camera Door Lock and Face Recognition Door Lock for enhanced security

Technical Parameters:

False Acceptance Rate	<0.1%
Lock Dimension	370mm * 76mm * 27mm
Network Connectivity	WiFi
Finger Usage Angle	360° Seamless Fingerprint Semi-conductor
Panel	CNC Aluminum Alloy
Battery Life	6-12 Months
Sell Point	Make Your Life Intelligent
System Selection	Tuya APP
Suitable Mortise	6085/6068 And More
Recognition Technology	Infrared Face Recognition

Applications:

The Face Recognition Door Lock model E-739 is an innovative security solution designed to make your life intelligent by combining advanced biometric technology with sleek design. Certified with CE and ISO9001, this Face Recognition Door Lock ensures high reliability and quality standards. Its CNC aluminum alloy panel not only provides durability but also adds a modern aesthetic to any door,

making it suitable for a variety of application occasions and scenarios.

Ideal for residential homes, the E-739 Face Recognition Door Lock offers homeowners a seamless and secure access method. The biometric door lock's 360° seamless fingerprint semiconductor technology allows users to unlock their doors quickly and effortlessly from any angle, making daily entry hassle-free. Operating efficiently within a temperature range of -10°C to 50°C, this lock performs reliably in different climates and environments, perfect for both indoor and outdoor installations.

In commercial buildings and office environments, the Face Recognition Door Lock provides enhanced security by restricting access to authorized personnel only. Its fast face recognition capability ensures smooth workflow without the delays caused by traditional key or password entry systems. With a voltage range of 3.7v to 4.2v, the lock offers energy efficiency and stable operation, suitable for busy access points where security is paramount.

The E-739 model is also well-suited for educational institutions, healthcare facilities, and hotels, where controlling access with precision and convenience is critical. The biometric door lock's robust design and advanced technology help prevent unauthorized entry, offering peace of mind to administrators and occupants alike. Additionally, with a minimum order quantity of 500 sets and a competitive price of 99 USD (EXW), it is an excellent choice for bulk procurement and large-scale security upgrades.

For those needing urgent installations or testing, the Face Recognition Door Lock can be delivered in just 7 days for samples, while finished products require 35-60 days for delivery. Payment terms are flexible, with T/T payments requiring a 30% advance and 70% payment before shipment, facilitating smooth transactions for both buyers and suppliers.

Overall, the E-739 Face Recognition Door Lock combines cutting-edge biometric technology with practical features and certification-backed quality, making it an ideal security solution across a wide range of applications and scenarios.

Customization:

Our Face Recognition Door Lock model E-739 is a high-quality Camera Door Lock certified with CE and ISO9001 standards, ensuring reliability and safety. We offer product customization services starting from a minimum order quantity of 500 sets, with a competitive price of 99 USD (EXW) per unit.

The Biometric Door Lock features an impressive recognition speed of ≤ 0.5 seconds and supports seamless 360° fingerprint scanning with a semi-conductor sensor. It is equipped with WiFi network connectivity and integrates smoothly with the Tuya APP system for easy remote management.

Operating efficiently in temperatures ranging from -10°C to 50°C, this Biometric Door Lock is designed to perform reliably in various environments. Our delivery time is 7 days for samples and 35-60 days for finished products, with payment terms of T/T: 30% advance payment and 70% before shipment.

Contact us to customize your Camera Door Lock and Biometric Door Lock solutions with guaranteed quality and prompt delivery.

Support and Services:

Thank you for choosing our Face Recognition Door Lock. To ensure optimal performance and security, please follow the guidelines below for technical support and services.

Installation Support: We recommend professional installation to guarantee proper setup and functionality. Detailed user manuals and installation videos are available to assist with the process.

Device Configuration: Configure your device through the dedicated mobile app or control panel. For initial setup, register authorized users' facial data carefully to enhance recognition accuracy.

Troubleshooting: If you encounter issues such as recognition failure, device not responding, or connectivity problems, please restart the device and check your network connection. Ensure the camera lens is clean and unobstructed.

Firmware Updates: Regular firmware updates are released to improve security features and device performance. Please keep your device updated through the official app or website.

Warranty and Repairs: Our product comes with a limited warranty covering manufacturing defects. For repair services, please refer to the warranty terms and avoid unauthorized modifications that may void the warranty.

Customer Support: For further assistance, consult the FAQ section in the user manual or access online resources for additional guidance and tips.

Your satisfaction and security are our priorities. We are committed to providing reliable support and services for your Face Recognition Door Lock.
