

Zinc Alloy Electronic Door Lock Motise Center Distance 70 95mm Access Control Device for Modern Security Installations

Basic Information

Product Specification

- Warranty: 2 Years
- Port: Shenzhen\guangzhou
- Motise Center Distance: 70*95mm
- Unlock Method: Card+Code+Key+Fingerprint+smartPhone
- Color: Black,Silver
- Function: Multi-function
- Operatingtemperature: -10°C To 50°C
- Material: Zinc Alloy
- Highlight: **Zinc alloy electronic door lock,
Motise access control device 70-95mm,
Smart hotel lock for modern security**

Product Description:

The Smart Hotel Lock is an advanced Electronic Door Lock designed to provide exceptional security, convenience, and versatility for modern hospitality environments. Engineered with cutting-edge technology, this Electronic Door Lock offers a reliable and user-friendly solution for hotels aiming to enhance guest experience while maintaining high standards of safety. With its multi-function capabilities and surface-mounted installation type, this lock seamlessly integrates into existing door structures, providing an efficient upgrade without the need for extensive renovations.

One of the standout features of this Electronic Door Lock is its robust data storage options, which include cloud-based storage. This innovative approach allows hotel management to securely store and manage access data remotely, facilitating real-time monitoring and easy retrieval of records. The cloud storage capability ensures that all access logs, user credentials, and system updates are safely backed up, reducing the risk of data loss and enabling swift response to any security concerns.

The Smart Hotel Lock is designed with the highest quality materials and components, ensuring durability and long-lasting performance. It is surface mounted, making the installation process straightforward and less intrusive compared to traditional embedded locks. This installation type not only saves time but also reduces labor costs, allowing hotels to quickly implement the lock system across multiple rooms or properties. Additionally, the lock's sleek and modern design complements a wide range of interior styles, enhancing the aesthetic appeal of guest rooms and common areas.

Functionality is at the core of the Smart Hotel Lock's design. This multi-function Electronic Door Lock supports various access methods, including RFID cards, mobile app control, password entry, and biometric verification, providing flexibility to accommodate different guest preferences and security requirements. The lock's advanced encryption technology ensures that all access credentials are protected against unauthorized use, delivering peace of mind to both hotel operators and guests.

Manufactured with precision, the Smart Hotel Lock is shipped from key ports including Shenzhen and Guangzhou, ensuring efficient and timely delivery to customers worldwide. This strategic distribution network supports rapid deployment and replenishment, making the lock an ideal choice for hotel chains and independent establishments alike. Furthermore, the product comes with a comprehensive 2-year warranty, reflecting the manufacturer's confidence in its reliability and commitment to customer satisfaction.

Beyond its security features, the Smart Hotel Lock enhances operational efficiency within hospitality settings. Hotel staff can easily manage access permissions remotely via the cloud platform, allowing for seamless check-ins, check-outs, and room changes without physical key exchanges. This capability not only improves guest convenience but also minimizes the risk of lost keys and unauthorized access. Moreover, the system's audit trail functionality provides detailed reports on who accessed which room and when, supporting compliance with safety regulations and internal policies.

In summary, the Smart Hotel Lock is a state-of-the-art Electronic Door Lock that combines security, convenience, and adaptability to meet the evolving needs of the hospitality industry. Its cloud data storage, multi-function access options, surface-mounted installation, and reliable warranty make it a superior choice for hotels seeking to modernize their security infrastructure. By choosing this Electronic Door Lock, hotel operators can ensure a secure, efficient, and guest-friendly environment that enhances overall satisfaction and operational excellence.

Features:

- Product Name: Smart Hotel Lock
- Type: Electronic Door Lock
- Port: Shenzhen / Guangzhou
- Installation Type: Surface Mounted
- Mortise Compatibility: America Mortise 70*95mm / 62*95mm
- Dimensions: 300mm x 70mm x 35mm
- Data Storage Options: Cloud
- High Security Electronic Door Lock suitable for hotels
- Advanced Electronic Door Lock technology for easy access control
- Reliable and durable Electronic Door Lock designed for frequent use

Technical Parameters:

Function	Multi-function
Mortise Center Distance	70*95mm
Port	Shenzhen\Guangzhou
Warranty	2 Years
Mortise	America Mortise: 70*95mm / 62*95mm
Security Level	ANSI Grade 2
Material	Zinc Alloy
Color	Black, Silver
Dimensions	300mm X 70mm X 35mm
Unlock Method	Card + Code + Key + Fingerprint + smartPhone

Applications:

The Smart Hotel Lock is an innovative Electronic Door Lock designed to enhance security and convenience across various application occasions and scenarios. Weighing just 1.5 Kg, this multi-function Electronic Door Lock combines robust construction with advanced technology, making it an ideal choice for hotels, resorts, serviced apartments, and other hospitality environments. Its compact dimensions of 300mm x 70mm x 35mm allow for seamless integration with existing door structures without compromising aesthetics or functionality. One of the primary application occasions for this Electronic Door Lock is in hotel rooms, where guest security and ease of access are paramount. The lock's surface-mounted installation type ensures quick and straightforward setup on doors equipped with American mortises sized 70*95mm or 62*95mm. This adaptability means it can be utilized in a wide variety of door designs commonly found in the hospitality industry, reducing installation time and associated costs.

Beyond hotels, this multi-function Electronic Door Lock is well suited for use in serviced apartments and short-term rental properties where property managers require a reliable, easy-to-manage locking system. The electronic features enable seamless integration with property management software, facilitating remote access control, keyless entry, and real-time monitoring of door status. This makes it perfect for environments where multiple users need secure, yet flexible access without the hassle of traditional keys.

Moreover, the Smart Hotel Lock excels in environments demanding heightened security combined with user-friendly operation, such as conference centers, executive suites, and private office spaces within hospitality venues. Its surface-mounted design allows for installation on both new and existing doors without major modifications, increasing its versatility. The lock's electronic capabilities support multiple unlocking methods, including RFID cards, PIN codes, and mobile app control, catering to diverse guest preferences and operational needs.

In summary, the Smart Hotel Lock serves a wide range of application occasions and scenarios, from standard hotel rooms to upscale serviced apartments and specialized hospitality areas. Its lightweight construction, multi-function electronic features, and compatibility with American mortises make it a reliable and flexible Electronic Door Lock solution that enhances security, convenience, and operational efficiency in any hotel or hospitality setting.
