### Product Description:

The Smart Hotel Lock is a cutting-edge Electronic Door Lock designed to enhance security and convenience for modern hospitality environments. Available in sleek Silver and Black finishes, this lock seamlessly integrates with standard hotel doors, providing a sophisticated and reliable solution for both guests and hotel management. Its contemporary design not only complements a wide range of interior styles but also offers robust functionality that meets the demanding needs of the hospitality industry.

One of the standout features of this Electronic Door Lock is its advanced motorized deadbolt locking mechanism. This mechanism ensures secure and precise locking and unlocking actions, eliminating the vulnerabilities often associated with traditional mechanical locks. The motorized deadbolt offers enhanced durability and smooth operation, making it an ideal choice for high-traffic areas such as hotel corridors. Guests can enjoy the peace of mind that comes with knowing their room is protected by state-of-the-art locking technology.

Battery life is a critical consideration in any electronic locking device, and the Smart Hotel Lock excels in this aspect by offering an impressive 12-month battery lifespan. This extended battery life reduces maintenance frequency, leading to lower operational costs and less disruption for hotel staff and guests. The lock also includes intelligent power management features that optimize battery usage while maintaining consistent performance throughout its lifespan.

Compatibility is another key attribute of the Smart Hotel Lock. Designed specifically to fit standard hotel doors, this lock can be easily installed without requiring extensive modifications or specialized hardware. This compatibility ensures that hotels can upgrade their security infrastructure quickly and cost-effectively. Moreover, the lock's user-friendly installation process minimizes downtime, allowing hotels to maintain smooth operations during the transition to electronic security solutions.

In the realm of data security and management, the Smart Hotel Lock offers robust cloud-based data storage options. This feature enables hotel management to securely store and access access logs, user credentials, and system configurations in a centralized cloud environment. The cloud integration facilitates real-time monitoring and remote management of multiple locks across different locations, enhancing operational efficiency and responsiveness. Additionally, cloud storage provides a reliable backup system, ensuring that critical data is protected against loss or tampering.

The Smart Hotel Lock is not just an Electronic Door Lock; it is a comprehensive security platform designed to meet the evolving needs of the hospitality industry. Its combination of aesthetic appeal, advanced motorized deadbolt technology, long-lasting battery life, and cloud-based data management makes it a superior choice for hotels seeking to upgrade their security systems. The dual color options, Silver and Black, allow customization to match various decor themes, enhancing the overall guest experience.

In summary, this Electronic Door Lock provides a perfect blend of style, security, and smart technology. Its motorized deadbolt locking mechanism ensures reliable protection, while the 12-month battery life guarantees uninterrupted operation. The lock's compatibility with standard hotel doors facilitates easy installation, and its cloud data storage capabilities offer powerful tools for hotel management. Whether you are upgrading an existing system or implementing a new security solution, the Smart Hotel Lock delivers exceptional performance and peace of mind. Choose the Smart Hotel Lock to elevate your hotel's security and provide guests with a seamless, secure, and modern access experience.

### Features:

- Product Name: Smart Hotel Lock
- Locking Mechanism: Motorized Deadbolt for enhanced security
- Network Connectivity: Wifi with SDK support for seamless integration
- Type: Electronic Door Lock designed for modern hotel security
- Weight: Lightweight at 1.5 Kg for easy installation
- Compatibility: Fits Standard Hotel Doors
- Advanced Electronic Door Lock technology ensuring reliable access control
- Durable and user-friendly Electronic Door Lock suitable for high-traffic areas
- Secure and convenient Electronic Door Lock solution for hotels

### Technical Parameters:

Lock Type	Electronic Door Lock
Dimensions	300mm X 70mm X 40mm
Port	Shenzhen/Guangzhou
Data Storage Options	Cloud
Locking Mechanism	Motorized Deadbolt
Application	Apartment / Hotel
Battery Life	12 Months
Compatibility	Standard Hotel Doors
Warranty	2 Years
Weight	1.5 Kg

### Applications:

The Smart Hotel Lock is an advanced Electronic Door Lock designed to provide enhanced security and convenience in a variety of accommodation settings. With dimensions of 300mm x 70mm x 40mm and weighing 1.5 Kg, this lock combines a sleek, modern design with robust functionality. Its motorized deadbolt locking mechanism ensures reliable and secure access control, making it ideal for both apartments and hotels.

In hotel environments, the Smart Hotel Lock is perfectly suited for guest rooms, offering a seamless check-in and check-out experience. Guests can easily unlock their doors using electronic credentials, eliminating the need for traditional keys and reducing the risk of lost or duplicated keys. This Electronic Door Lock also supports integration with hotel management systems, allowing staff to efficiently manage room access remotely and provide temporary or permanent access codes as needed. Its motorized deadbolt mechanism guarantees a secure lock every time, enhancing overall property security.

For apartment complexes, the Smart Hotel Lock provides residents with a modern and convenient security solution. Property managers can issue electronic keys that can be easily updated or revoked, improving access control and reducing security risks. The lock's sturdy construction and reliable motorized deadbolt make it suitable for high-traffic residential environments, ensuring the safety of tenants and their belongings. Its compact size allows it to be installed without compromising door aesthetics or functionality.

Beyond traditional hospitality and residential uses, the Electronic Door Lock can be applied in various other scenarios requiring secure and flexible access control. This includes serviced apartments, boutique hotels, vacation rentals, and even office spaces where controlled entry is essential. The lock's smart features enable integration with mobile apps and keycard systems, providing a versatile solution for modern access management needs.

Overall, the Smart Hotel Lock stands out as an innovative Electronic Door Lock that combines ease of use, security, and adaptability. Whether in apartments or hotels, its motorized deadbolt mechanism and compact dimensions make it an excellent choice for securing doors while enhancing user experience. Its application in diverse scenarios underscores its value as a reliable and efficient security device in today's technology-driven world.
