Product Description:

The Smart Hotel Lock is an advanced Electronic Door Lock designed to provide superior security and convenience for modern hospitality environments. Featuring a motorized deadbolt locking mechanism, this state-of-the-art lock ensures robust protection for hotel guests while offering seamless integration with existing property management systems (PMS) such as Fidelio, Opera, and other popular platforms. Its compatibility with standard hotel doors makes it an ideal solution for hotels seeking to upgrade their security infrastructure without extensive modifications.

At the heart of the Smart Hotel Lock is its motorized deadbolt, a sophisticated locking mechanism that delivers enhanced durability and reliability. Unlike traditional mechanical locks, the motorized deadbolt operates electronically, allowing for smooth and silent locking and unlocking processes. This feature not only improves guest experience by reducing noise but also enhances security by eliminating the vulnerabilities associated with manual key systems. The motorized deadbolt mechanism is engineered to meet the rigorous demands of hotel operations, ensuring consistent performance day after day.

One of the standout features of this Electronic Door Lock is its seamless integration with major property management systems such as Fidelio and Opera, which are widely used in the hospitality industry. This compatibility enables hotel staff to manage room access efficiently, monitor lock status in real-time, and streamline guest check-in and check-out procedures. Additionally, the lock supports integration with other PMS platforms, providing flexibility for hotels with customized or less common management software. This interoperability is crucial for maintaining operational efficiency and enhancing the overall guest experience.

Designed to fit standard hotel doors, the Smart Hotel Lock is adaptable to various door types and thicknesses, making installation straightforward and cost-effective. The lock supports mortise sizes of 70*95mm and 62*95mm, covering the most commonly used dimensions in hotel door construction. This versatility means hotels can implement the Electronic Door Lock across multiple room types and building structures without the need for extensive door modifications or replacements.

As an Electronic Door Lock, this product offers a host of benefits beyond traditional locking systems. The electronic nature of the lock allows for advanced access control methods, including key cards, mobile app access, and even biometric options where applicable. This flexibility enhances security by minimizing the risk of unauthorized entry and lost keys, common issues in conventional lock systems. Moreover, electronic locks can generate detailed access logs, providing hotel management with valuable data for security audits and guest service improvements.

The Smart Hotel Lock also emphasizes user convenience and energy efficiency. Its electronic components are designed for low power consumption, ensuring long battery life and reducing maintenance frequency. Guests benefit from quick and easy access to their rooms, while hotel staff enjoy simplified lock management and reduced operational burdens. The lock's sleek and modern design complements contemporary hotel aesthetics, adding both functional and visual value to guest rooms.

In summary, the Smart Hotel Lock is a cutting-edge Electronic Door Lock solution tailored for the hospitality industry. With its motorized deadbolt locking mechanism, compatibility with major PMS systems like Fidelio and Opera, and adaptability to standard hotel doors with mortise sizes of 70*95mm and 62*95mm, it provides an optimal balance of security, convenience, and operational efficiency. Hotels looking to enhance their security infrastructure and guest experience will find this Electronic Door Lock an excellent investment that meets the demands of today's hospitality environment.

Features:

- Product Name: Smart Hotel Lock
- Type: Electronic Door Lock
- Weight: 1.5 Kg
- Compatible with PMS: Fidelio, Opera, Others
- Port of Shipment: Shenzhen/Guangzhou
- Mortise Size: 70*95mm or 62*95mm
- Warranty Period: 2 Years
- Reliable Electronic Door Lock for Enhanced Security
- Advanced Electronic Door Lock Technology for Hotels
- User-friendly Electronic Door Lock System

Technical Parameters:

Dimensions	300mm X 70mm X 40mm
Weight	1.5 Kg
Data Storage Options	Cloud
PMS Compatibility	Fidelio, Opera, Others
Color	Silver / Black
Application	Apartment / Hotel
Warranty	2 Years
Compatibility	Standard Hotel Doors
Mortise	70*95mm / 62*95mm
Locking Mechanism	Motorized Deadbolt

Applications:

The Smart Hotel Lock is an advanced Electronic Door Lock designed to enhance security and convenience in various accommodation settings. With a sleek silver or black finish, this lock seamlessly integrates into both modern and classic interior designs, making it an ideal choice for apartments and hotels alike. Its motorized deadbolt locking mechanism ensures robust security while offering smooth and silent operation, providing guests and residents with a reliable access control solution.

One of the key application occasions for this Electronic Door Lock is in the hospitality industry. Hotels seeking to upgrade their security systems can benefit from the lock's compatibility with popular Property Management Systems (PMS) such as Fidelio, Opera, and others. This integration enables seamless management of guest access, allowing hotel staff to easily assign, monitor, and revoke room access electronically. The lock's battery life of up to 12 months ensures long-lasting performance without frequent maintenance, making it especially suitable for high-traffic environments where reliability is paramount.

In addition to hotels, this Electronic Door Lock is perfectly suited for apartment complexes aiming to provide residents with secure and convenient keyless entry. Property managers can leverage the lock's motorized deadbolt to enhance safety while offering residents the ease of electronic access control. The lock's durable build and modern aesthetics also contribute to the overall appeal and value of the property. Whether for short-term rental units or long-term residences, the Smart Hotel Lock offers a versatile solution that addresses the unique security needs of each setting.

Furthermore, the lock's adaptability makes it an excellent choice for mixed-use developments that combine residential spaces with hospitality services. Its ability to integrate with various PMS platforms facilitates streamlined operations across different property types. The long battery life minimizes downtime and maintenance efforts, ensuring that both guests and residents enjoy uninterrupted access throughout their stay or tenancy.

In summary, the Smart Hotel Lock is a cutting-edge Electronic Door Lock that caters to a wide range of application occasions and scenarios. From upscale hotels to modern apartments, its motorized deadbolt mechanism, extended battery life, and seamless PMS integration provide a comprehensive security solution. Available in elegant silver and black, this lock not only secures but also enhances the aesthetic and operational efficiency of any property it serves.
